Datamax Clone Printheads

Smart and Long-Life Printheads

- The Long-Life and Smart Printhead™ advancement **drives down thermal label printing costs.**
- The new family of Long-Life and Smart Printheads™ are designed to last **up to 3 times longer** than the Original Equipment Manufacturer (OEM) printheads they replace.
- The on-board computer of the Smart Printhead™ tracks the product usage, allowing the warranty to be based upon linear usage rather than a fixed time period. The **linear inch based warranty** means that stocks of Smart Printheads™ can be held without fear of warranty expiration before the product is needed.
- Each Smart Printhead™ comes with a **minimum 1 million linear inch** warranty. Printheads with 2 and 3 million linear inch warranties are also available.
