RhinoDeck Weighing Scales

Features

The RhinoDeck series of superior performance floor scales offer the ultimate in choice and flexibility. Three standard models (PM, GM, SP) are available, each model is offered in two capacities and accuracies of 1500kg x 0.5kg and 3000 x 1kg.

Designed as heavy-duty industrial performers, utilizing a structural channel frame and non slip 1.2m x 1.2m diamond deck safety tread plate, with a range of quality finishes. The PM has a standard painted finish, the model GM has a galvanized finish for more rugged use, with the top of the range SP model constructed in stainless steel for harsher conditions.

Matched options such as indicator stand, ramps etc can be found in the associated products list below.

The RhinoDeck features are extensive and listed below.

- General purpose platform scale
- 20mm LCD display with LED backlighting.
- Membrane keypad with multi function keys.
- Mounting brackets on all indicators.
- Mains input with power on/off.
- Structural steel channel frame.
- Rugged safety diamond deck tread plate surfaces.
- Four high precision Shearbeam load cells.
- Bi-directional RS232.
- Four high quality fully adjustable multi directional swivel support feet.
- SP models supplied with Premier self draining stainless swivel feet.
- SP models supplied with welded sealed stainless load cells.
- Internal adjustable junction box, die cast sealed construction with watertight glands.
- Threaded holes and eye bolts for easy lifting.
- Package configured and factory calibrated to give 3000 division accuracy over the whole weighing range.
- Optional ramps.
- Optional indicator stand.
